

CURRICULUM

Nguyễn Thị Thu Thủy

**UI & UX DESIGNER
FRONT-END DEVELOPER**

2023

Nguyễn Thị Thu Thủy

UI/UX DESIGNER FRONT-END WEB DEVELOPER

BIO

Hello! I'm Thuy Nguyen . With a strong passion in designing User Interfaces for Mobile and Website to become more beautiful and clear. Besides that, I have to strike a balance between easy to use customer and developer easy to program to come up with the perfect products.

I consider myself a creative, open minded and proactive person, who enjoys teamwork and who is always willing to face new challenges. Moreover, I always update new styles about design from social media (Facebook, Instagram, Behance, Dribbble..). This isn't only a big resource to discover but also to connect with designers worldwide.

I believe that this is one of the best ways to perfect yourself more in the future.

Content working

- Get the designing content (**Storyboard**)
- Make **idea**, choose **color, font type**.
- **Make components** for color concept, type of text, items, list object by XD tool.
- Arrange layout, design interface and think about how customers use it to ease.
- After finished designing UI, Check ui and wait for approval from the Leader.
- Send it to the developer and **support UI with developer** (make **HTML, Css file, Scss file**, create **component reactjs...**). Make style for **hover, active, focus action**, app Screenshot Mockup, make icon svg, banner CTA...).
- **Check UI** (font-size, color, type of text synchronization of components), edit, improve after the Developer finished the project.
- Completed the project.
